TUDOR CONSTANTIN

DEVELOPMENT / SYSTEMS / DIGITAL SERVICES

Amposta, Tarragona · Remote work experience

PROFILE

Technology professional with experience in developing digital solutions, systems, security and support. I combine building new features with managing services and resolving technical incidents. I work independently, with a practical mindset and the ability to investigate problems and learn new tools.

01 PROFESSIONAL EXPERIENCE

Web Developer

Ingenium Marketing

March 2024 – Present | 100% remote

- Responsible for IT operations: assessing needs, selecting solutions, providing support and coordinating suppliers.
- Development and maintenance of websites, features and integrations using WordPress, PHP, WooCommerce, APIs and databases.
- Management of servers and VPS, domains, DNS, SSL, corporate email, deployments and migrations.
- Security and continuity: access control, backups, incident investigation and recovery of compromised websites.

Web Developer · Internship

Hitech Informática

November 2022 – May 2023 | Amposta

Contributed to web development using PHP and Bootstrap.

02 HOW I WORK

End-to-end perspective. I understand the complete lifecycle: developing, deploying and maintaining digital solutions.

Problem-solving. I investigate issues, test alternatives and follow up until they are resolved.

Independence and communication. I prioritize incidents, document processes and support clients and users.

03 AREAS OF EXPERTISE

Development and integrations
Websites, applications, PHP, WordPress, Laravel, WooCommerce, REST APIs and SQL.

Infrastructure and deployments
Linux, VPS, Apache/Nginx, Docker, DNS, SSL, email and migrations.

Security and continuity
Access management, backups, vulnerability assessment and service recovery.

Analytics and support
GA4, Tag Manager, Search Console, technical SEO, incident handling and documentation.
